INDEX TO VOLUME XXIII

Asimow, L., and **Atkinson, H.**, Dominated extensions of continuous affine functions with range an ordered Banach space . 383

Atkinson, H., *see* **Asimow, L.**

Backhouse, N. B., and **Bradley, C. J.**, Projective representations of space groups, IV: Asymmorphic space groups . . . 225

Bondy, J. A., Transversal matroids, base-orderable matroids, and graphs 81

Bradley, C. J., *see* **Backhouse, N. B.**

Bryant, R. M., and **Vaughan-Lee, M. R.**, Soluble varieties of Lie algebras 107

Cohn, J. H. E., Some integral inequalities (II) 143

Colton, David, On the analytic theory of pseudoparabolic equations 179

Cook, R. J., A note on a lemma of Hua 287

Coury, J. E., On the existence of M-sets in the product of k-element groups 13

Davies, Roy O., Limits of sequences of real functions . . 57

Devinatz, Allen, The deficiency index of certain fourth-order ordinary self-adjoint differential operators 267

Eggar, M. H., On solving homotopy equivalences . . . 79

Everitt, W. N., On the limit-circle classification of second-order differential expressions 193

—— and **Sircar, Annapurna**, On the integration of certain second-order linear differential equations 391

Galambos, János, The distribution of the largest coefficient in continued fraction expansions 147

Griffith, Phillip, $\aleph_n$-free abelian groups 417

Hastings, S. P., On a third order differential equation from biology 435

Ichiraku, Shigeo, and **Kato, Mitsuyoshi**, On higher-dimensional strings of codimension two 239

Irwin, M. C., On the smoothness of the composition map . . 113

Iyengar, H. R. Krishna, Semilattice of bisimple inverse semigroups 299

Jhaveri, Charu S., *see* **Willmore, T. J.**

Jones, G. A., Regular subgroups of uniprimitive permutation groups of degree p^3, where p is prime 325

Johnston, Peter T., The stable group of homotopy equivalences 213

Kato, Mitsuyoshi, *see* **Ichiraku, Shigeo**

Kumpel, P. G., Jr., On p-equivalences of mod p H-spaces . . 173

Lam, Kee Yuen, Sectioning vector bundles over real projective spaces 97

Lambert, P. J., Characterizing groups by their character tables, I. 427

Locker, John, Least squares and boundary value problems for linear systems 91

Macdonald, I. G., and **Sharp, Rodney Y.,** An elementary proof of the non-vanishing of certain local cohomology modules . 197

Macdonald, Sheila Oates, and **Street, Anne Penfold,** On laws in linear groups 1

Martineau, R. Patrick, Elementary abelian fixed point free automorphism groups 205

McLeod, J. B., The existence and uniqueness of a similarity solution arising from separation at a free stream line 63

Mercer, A. McD., On the mean convergence of a certain class of exponential series 365

Mordell, L. J., A new type of exponential series. 373

Northcott, D. G., Generalized Koszul complexes and Artinian modules 289

Scott, G. P., On sufficiently large 3-manifolds 159

Segal, Graeme, Permutation representations of finite p-groups . 375

Shar, Albert, Localizations and the homotopy groups of certain complexes 249

Sharp, Rodney Y., *see* **Macdonald, I. G.**

Sheil-Small, T., On Bazilevič functions 135

Sircar, Annapurna, *see* **Everitt, W. N.**

Stone, D. A., Towards the classification of block bundles with fibre $S^p \times S^q$ 337

Street, Anne Penfold, *see* **Macdonald, Sheila Oates**

Thompson, Mark, Eigenfunction expansions and the associated scattering theory for potential perturbations of the Dirac equation 17

Tollefson, Jeffrey L., and **Tondra, Richard J.,** Seifert spaces and extensions of groups with centre 401

Tondra, Richard J., *see* **Tollefson, Jeffrey L.**

Upadhyay, Manjari, A note on a paper of G. E. Andrews . . 221

Vaughan-Lee, M. R., *see* **Bryant, R. M.**

Willmore, T. J., and **Jhaveri, Charu S.,** An extension of a result of Bang-yen Chen. 319

Wright, D. J., On the maximality of multiplicity 349

Wright, E. M., Stacks (III) 153

Wright, J. D. Maitland, Extensions of infinite vector lattice measures 259
